DETAILED ACTION

Receipt is acknowledged of change of address, extension of time and amendment A filed on 12/13/02 and 6/9/03.

Claim 30 has been added as per applicant's amendment dated 6/9/03. Claims 1-30 are pending in the application and the status of the application is as follows:

The following new ground of rejection is necessitated by the amendment.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. **This is new matter rejection.**

There is no support in the specification for “at least two and separate liquid phases upon setting”. There is also no support for “fourth distinct and separate phase”

In accordance with MPEP 714.02 applicant's should specifically point out support for any amendments made to the disclosure.

The following rejection is maintained for reasons of record.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 11, 13, 16, 18-19 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Fowler et al. 5,635,469 ('469).

See col.13, lines 50-67 and col.14, lines 1-35 for anionic surfactant, which reads on the claimed surfactant solution, and specific surfactants of claim 11. See col.col.4, lines 35-65 and col.6-7 for the various cationic, amphoteric and non-ionic surfactants, which reads on the claim 13. Since all the components are the same, the mixing of these ingredients will result in the specific gravity claimed and the layers claimed (inherent property) absence of evidence to the contrary. Since the components are the same the claims 16 is inherent. See the abstract for the personal cleansing product and see the examples.

Response to Arguments

3. Applicant's arguments filed 6/8/03 have been fully considered but they are not persuasive.
4. Applicants point out that the patent '469 does not disclose compositions which are in two layers and applicants argue that patent does not specifically disclose composition which meets the limitations of the claims of the present invention.
5. In response to the above argument, it is the position of the examiner that the examples II-IV disclose the surfactant which is "*ammonium cocoyl isothionate*" and disclose emollient which is "*sodium isostearoyl lactylate or Lauryl pidolate*". Hexylene glycol is the penetration

enhancer. With respect to separate phases, the specification at page 8, last paragraph defines **phase as** “ a distinct layer which appears in composition according to the present invention after a sufficient settling period(preferably, at least about 1 minute, more often about 5 minutes or more up to about 30 minutes and in certain embodiment, up to several days or more)”.

Applicants did not present any evidence which shows that the examples of the patent did not separate out as phases. The 102 rejections is deemed proper.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
